

Tube-O-DIALYZER, Micro 8K MWCO

Product Information

Cat#No# TOD-003D

Product Overview

The unique, patented tube design of Tube-O-DIALYZERTM permits easy sample handling and manipulation, without the use of specialized loading devices, costly syringes or hazardous needles. This specialized tube format also allows for easy sample loading, as simple as transferring your sample to a microcentrifuge tube. Storage caps provided for convenient storage of dialyzed samples

Characteristic

Micro for 20-250µl samples, Medi for 0.2-2.5ml samples; Nearly 100% sample recovery every time, even if sample precipitates; No use of specialized loading devices, costly syringes or hazardous needles.

Applications

Dialysis of small sample volumes; Equilibrium dialysis for buffer exchange; Dialysis for single use applications, such as infectious and radioactive samples;

Packing Column

5 PK/20 PK

Storage

2-8°C

Notes
