

# CHT Ceramic Hydroxyapatite and Crystalline Hydroxyapatite Resins

## Product Information

---

### Product Overview

---

CHT Ceramic Hydroxyapatite and Crystalline Hydroxyapatite Resins offer unique selectivities, enabling the resolution of mixtures that appear homogenous with other media. These mixed-mode resins can be used at any stage in a chromatographic workflow from initial capture to final polishing and are ideal for the purification of monoclonal antibody (mAb) products.
